

# Estate Tax Returns, 1992-1993

## Data Release

In 1993, there were 60,211 Federal estate tax returns (Form 706) filed for U.S. decedents with gross estates of at least \$600,000, the filing requirement in effect since 1987 [1,2]. This was an increase of 1.7 percent over the 59,176 returns filed in 1992. Returns filed in 1993 reported combined gross estates of almost \$104 billion, 4.9 percent more than 1992. In general, the growth in both the number of returns filed and the total value of assets reported was less than in previous years, due, in part, to the recession which began in mid-1990. Although this recession lasted only about 8 months, recovery was much slower than expected; the economy did not begin to pick up until the latter part of 1992 [3].

The largest component of total gross estate for returns filed in 1993 was investments in corporate stock, which made up over 31 percent of all assets. Over 77 percent of all returns filed reported some stock holdings. Of the \$32.6 billion invested in corporate stock, 25 percent, or \$8.2 billion, was invested in closely-held corporations. This stock is usually issued by small, family controlled corporations and is not listed or traded on a public stock exchange.

Investments in real estate accounted for the second largest portion of total assets, making up nearly 21 percent of the total. The value of the decedents' personal residence accounted for about \$7.6 billion, or about 35.5 percent of the \$21.5 billion total invested in real estate. The rest consisted primarily of investment, commercial, and recreational properties.

Federal estate tax returns filed in 1993 reported allowable deductions of over \$47.3 billion. Of this amount, about 69.3 percent, or \$32.8 billion, was attributable to the unlimited deduction for bequests to a surviving spouse. For the 32,705 returns reporting no tax liability, this deduction made up over 79 percent of the total allowable deductions.

Contributions to charitable organizations accounted for another 15.4 percent of the deductions allowed against total gross estate. Overall, 18.5 percent of the returns reported a charitable bequest, slightly less than in previous years. The almost \$7.3 billion donated was just over 7.3 percent of the decedents' total net worth reported in 1993.

After deductions, returns filed in 1993 reported combined "taxable estates" of over \$57 billion. In addition, these decedents had made a total of almost \$2 billion in taxable gifts to individuals during their lifetimes. These gifts were included in the "adjusted taxable estates" of

Federal estate tax return filers [4]. Combined, these amounts generated a reported tax liability after credits of over \$10 billion. Tax law changes originally planned for 1987, which reduced the top estate tax rate to 50 percent, thereby eliminating the 53 and 55 percent brackets, went into effect on January 1, 1993. However, the Omnibus Budget Reconciliation Act of 1993, enacted in August 1993, restored the previous higher rates, retroactively.

### Data Collection Changes for 1992 and 1993

Previous Statistics of Income (SOI) articles have reported on the phenomenal growth of investments in mutual funds included in the gross estates of Federal estate tax decedents. Each year, more and more people are able to take advantage of the wide range of personal investment opportunities made possible by the ever growing number of mutual funds offered by investment companies, banks, insurance companies, and others. SOI has always classified mutual funds according to the fund's primary investment objective. For example, funds which invest primarily in tax-free bonds issued by State and local Governments were grouped with direct investments in those types of bonds, and so on. In the past, mutual funds with mixed objectives, for example, those made up of investments in both stocks and bonds, were generally grouped with investments in corporate stock; the relative small value of investments in such funds had little effect on the overall statistics. However, the dramatic increase in the number and size of investments in mutual funds led to the addition of two new asset categories beginning with data collected from returns filed in 1992. These are "mixed bond funds," which consist of investments in funds made up of several different types of bonds (Federal, State, local, and corporate) and "mixed mutual funds," which are primarily funds which invest in both stocks and bonds, as well as in other investment securities. Please note that money market mutual funds, because of the liquidity of these investments, are included with "cash" in Tables 1 and 2.

A second change reflects the increase in recent years of real estate investments through partnerships. In the past, all investments in partnerships were grouped together with investments in other non-corporate businesses for the statistics. Real estate partnerships are formed primarily for the purpose of developing or holding real estate. There is little to distinguish between such partnerships and other investment real estate owned outright by a decedent. On the other hand, they are different from partnerships which represent going concerns, such as construction companies, law firms, or accounting businesses. Therefore, a separate classification for real estate partnerships

*This data release was written by Barry W. Johnson, an economist with the Foreign Special Projects Section, under the direction of Michael Alexander, Chief.*

## Estate Tax Returns, 1992-1993

was added in 1993; they are grouped with "other real estate" in the tables which follow.

### Data Sources and Limitations

The data presented in this release are estimates based on samples of Federal estate tax returns filed in 1992 and 1993. These samples were limited to returns filed for decedents who were U.S. citizens or resident aliens, with total gross estates of at least \$600,000 [5]. The samples are designed to cover returns filed over a 3 year period, focusing on a particular year of death, in this case 1992. This design allows detailed study of the economy during a particular year, as well as annual revenue estimates. The sample for the 1992 filing year included 7,540 returns out of a total population of 59,176. In 1993, 12,461 returns were sampled out of a total of 60,211.

Estate tax returns were statistically sampled while the returns were being processed for administrative purposes, but before audit examination. Thus, returns were selected on a flow basis, using a stratified random probability sampling method, whereby the sample rates were preset based on the desired sample size and an estimate of the population. The design had three stratification variables: year of death, age at death, and size of total gross estate. For the 1992 and 1993 filing years, the year of death variable was separated into two categories: 1992 year of death and non-1992 year of death. Age was disaggregated into five categories: under 40, 40 under 50, 50 under 65, 65 under 75, and 75 and older (including age unknown). Total gross estate was limited to five categories: \$600,000 under \$1 million, \$1 million under \$2 million, \$2 million under \$5 million, \$5 million under \$10 million, and \$10 million or more. Sampling rates ranged from 7 to 100 percent; over half of the strata were selected at the 100 percent rate.

### Explanation of Selected Terms

Brief definitions of some of the terms used in the tables are provided below:

**Adjusted Taxable Estate.**—Adjusted taxable estate was equal to the sum of "taxable estate" and "adjusted taxable gifts."

**Adjusted Taxable Gifts.**—Gifts made by a decedent during his or her lifetime were not generally included in the gross estate. Instead, they were added to the "taxable estate", creating the "adjusted taxable estate" for the purpose of determining the "estate tax before credits" (see [4]).

**Allowable Unified Credit.**—This was equal to the "unified credit" less a reduction for the tax exemption allowed against pre-1977 gifts. This reduction was limited to \$6,000.

**Bequests to Surviving Spouse.**—This was equal to the value of property interests passed from the decedent to the surviving spouse and taken as a deduction from the "total gross estate."

**Estate Tax After Credits.**—This was the tax liability of the estate remaining after subtraction of credits for State death taxes, foreign death taxes, taxes on prior transfers, and Federal gift taxes previously paid. In addition, a "unified credit," graduated according to the year of death, was allowed (see also "unified credit").

**Estate Tax Before Credits.**—This was the tax obtained by applying the graduated estate tax rates to the "adjusted taxable estate" reduced by the amount of "Federal gift taxes previously paid" on gifts made after 1976.

**Federal Gift Taxes Previously Paid.**—Taxes paid on gifts made after 1976 are subtracted from the estate tax before the credits are applied (see "estate tax before credits"). A separate credit was allowed against the estate tax for the Federal gift tax paid on a gift made by a decedent before 1977.

**Net Worth.**—Net worth was equal to the "total gross estate" less mortgages and other debts.

**Nontaxable Returns.**—Nontaxable returns were those with no estate tax liability after credits.

**Other Tax Credits.**—This is the sum of all tax credits for State estate, inheritance, or legacy taxes; foreign death taxes; Federal gift taxes; and taxes on prior transfers taken as a deduction against the "estate tax before credits."

**Tax on Prior Transfers.**—A tax credit was allowed for Federal estate tax paid on property received by the decedent or the estate from a transferor who died within 10 years before, or 2 years after, the decedent. The credit was intended to lessen the burden of double taxation between successive estates whose owners had died within a short period of time. Depending on the time that elapsed between the deaths, a credit was allowed for all or part of the Federal estate tax paid by the transferor's estate with respect to the transfer.

**Taxable Estate.**—This is equal to the value of the "total gross estate" less deductions for the following: funeral and administrative expenses; casualty and theft losses; debts, mortgages, losses and other claims against the estate, including pledges to charitable organizations; bequests to the surviving spouse; and the "employee stock ownership plan" (ESOP) deduction (included in the statistics for "other expenses and losses").

**Taxable Returns.**—Taxable returns were those with an amount of "estate tax after credits."

**Total Gross Estate.**—An estate tax return was required in the case of every decedent whose gross estate at the time of death exceeded the legal filing requirement in

effect for the year of death. For estate tax purposes, the gross estate included all property or interest in property before reduction by debts (except policy loans against insurance) and mortgages, or administrative expenses. Included in the gross estate were such items as real estate, tangible and intangible personal property, certain lifetime gifts made by the decedent, property in which the decedent had a general power of appointment, the decedent's interest in annuities receivable by the surviving beneficiary, the decedent's share in community property, life insurance proceeds (even though payable to beneficiaries other than the estate), dower or courtesy of the surviving spouse (inherited property) and, with certain exceptions, joint estates with right of survivorship and tenancies by the entirety. Estate tax laws provide for valuing all assets at their value on the day of the decedent's death, or on a date 6 months after death (alternate valuation) if there had been a significant decline in the value of any assets following the decedent's death. The data presented in this release are those values reported for the purposes of calculating the tax liability and may, therefore, be valued on either date.

**Total Transfer Taxes.**—This is the total of the "estate tax after credits," generation skipping transfer tax, and tax on excess retirement accumulations (section 4980A(d) of the Internal Revenue Code).

**Unified Credit.**—The unified credit, so called because it is used for both estate and gift tax purposes, is applied as a dollar-for-dollar reduction of the estate tax. (The unified credit represents the amount of tax on that part of gross estate which is below the filing requirement.) The credit must be used to offset gift taxes on lifetime transfers made after 1976. However, to the extent it is so used, the amount of credit available at death is reduced.

### Notes and References

- [1] A Federal estate tax return must be filed within 9 months of the decedent's death unless a 6 month extension is granted. Because of this, returns filed in 1993 were primarily for decedents who died in 1992 and late 1991. Likewise, returns filed in 1992 were primarily for decedents who died in 1991 and late 1990.
- [2] This data release presents basic data for Federal estate tax returns filed in 1992 and 1993, with a focus on the more recent data. Data for returns filed in 1994 should be available sometime in the fall of 1995. A future article will include basic data for 1994 with a focus on returns filed over the 3-year period 1992-1994, focusing on 1992 decedents.
- [3] *Economic Report of the President*, Washington, DC, 1993, p 3.
- [4] Tax law changes which went into effect in 1982 unified the tax rates and credits which applied to all transfers of property, whether made during life or after death. Therefore, all taxable gifts (those exceeding the annual exclusion at the time the gift was given) made on or after January 1, 1982, are eventually reported on the Form 706. This assures that the transfers are taxed at the highest marginal tax rate, eliminating any tax benefit due solely to the timing of the transfer. A credit is given for any gift taxes that were paid at the time the gift was given.

<sup>1</sup> Gross estate is shown at the value used to determine estate tax liability. The value could be determined as of date-of-death or 6 months thereafter (i.e., alternate valuation method).

<sup>2</sup> Net worth is calculated as "Total gross estate" less "Debts and mortgages." Negative values of net worth were constrained to zero.

<sup>3</sup> Life insurance is shown net of any outstanding policy loans and associated interest and penalties.

\*\* Data deleted or combined to prevent disclosure of individual taxpayer data.

NOTE: Detail may not add to totals because of rounding.

<sup>1</sup> Gross estate is shown at the value used to determine estate tax liability. The value could be determined as of date-of-death or 6 months thereafter (i.e., alternate valuation method).

<sup>2</sup> Net worth is calculated as "Total gross estate" less "Debts and mortgages." Negative values of net worth were constrained to zero.

<sup>3</sup> Life insurance is shown net of any outstanding policy loans and associated interest and penalties.

\*\* Data deleted or combined to prevent disclosure of individual taxpayer data.

NOTE: Detail may not add to totals because of rounding.

<sup>1</sup> Gross estate is shown at the value used to determine estate tax liability. The value could be determined as of date-of-death or 6 months thereafter (i.e., alternate valuation method).

<sup>2</sup> U.S. citizens domiciled abroad.

NOTE: Detail may not add to totals because of rounding.
